### Saf-T Vent CI Plus

*Saf-T Vent CI Plus* is the leading commercial double-wall special gas vent system made from superferritic stainless steel. With increased airspace between the inner flue conduit and the outer jacket, today's CI Plus reduces the required clearance to combustibles and makes a more rigid flue pipe - large diameters are easier to handle.

### Saf-T Vent SC

The *Saf-T Vent*® SC is a concentric vent system designed for zero clearance installation in residential and light commercial applications. It is approved for use on ANSI category I, II, III, and IV Gas-burning appliances, and direct vent or sealed combustion appliances approved by the appliance manufacturer.

### Saf-T Vent EZ Seal

Now, the strongest special gas vent is also the easiest to install. With new integral seal, and patented *Ring and Tab*™ closure system, *Saf-T Vent EZ Seal* is the fastest and most reliable venting solution for Category I, II, III and IV gas appliances – with no RTV sealant required. Look inside. The red seal is your guarantee of *Saf-T Vent* quality – and performance you can depend upon.

**Saf-T Vent**  
AL29-4C Special  
Gas Vent Systems.
